

HCC Orbit Reel Kits

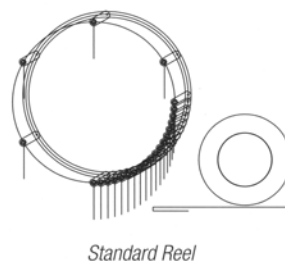

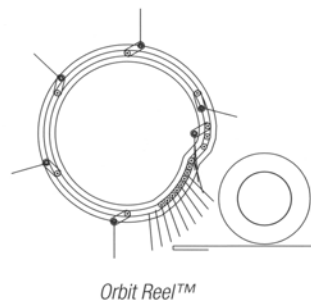

- * **Positively Places Crop Into the Auger**
- * **Reduces or Eliminates Slugging**
- * **Continuous Crop Flow**
- * **Adjustable Reel Path for specific header depth and auger size.**
- * **Resists Wrapping in Green Crop**
- * **On-Farm Installation in a few hours**

Anyone who has harvested with a grain or flex header has seen crop hesitate in front of the auger, resulting in slugging, reel carry-over, and slower harvest speeds. This gap between the reel and the auger has frustrated operators and manufacturers since the introduction of the reel. HCC has finally closed the gap with a design that positively places crop into the auger.

The Orbit Reel is a proven solution that has been field tested by large operators and custom cutters for six years. The Orbit reel is designed as a retrofit for all HCC pipe reels. Installation is easy and can be accomplished on the farm in a few hours.

The old fashioned reel drive is replaced with a new double track system. The unique shape of the Orbit Reel allows the reel tines to break their circular path and swing directly past the auger reducing build up and slugging.

HCC Orbit Kit Pricing

Please understand that the HCC orbit kit will only work with HCC pipe reels. HCC is the manufacturer of OEM pipe reels made 1990 and later for John Deere, Agco, Case-IH, New Holland, and others. The HCC orbit kit will not work with the CFC manufactured pipe reel.

Agco (400 series and newer only)
